Title: Application to Use the Automated Commercial Environment (ACE)

OMB Number: 1651-0105

Abstract: The Automated Commercial Environment (ACE) is a trade processing system that will eventually replace the Automated Commercial System (ACS), the current

import system for U.S. Customs and Border Protection (CBP) operations. ACE is authorized by Executive Order 13659 which mandates implementation of a Single Window for trade. See 79 FR 10655 (February 25, 2014). ACE supports government agencies and the trade community with border-related missions with respect to moving goods across the border efficiently and securely. Once ACE is fully implemented, all related CBP trade functions and the trade community will be supported from a single common user interface.

Currently, ACE is used for imported merchandise by brokers, carriers, sureties, service providers, facility operators, foreign trade zone operators, cart men and lighter men. In order to establish an ACE Portal account, participants submit information such as their name, their employer identification number (EIN) or social security number, and if applicable, a statement certifying their capability to connect to the internet. This information is submitted through the ACE Secure Data Portal which is accessible at:

<http://www.cbp.gov/trade/automated>

CBP is proposing to add export functionality to the system which will allow participation from the exporter community. Trade members wishing to establish an exporter account will need to submit the following data elements:
